About Us

Over the years, the construction industry has adopted modern technologies to minimize labor and optimize speed of work. To serve the construction industry, our company, Care Equipment has been engaged as a manufacturer and supplier of Material Handling Equipment, Drum Lifter and Tilter, Industrial Hydraulic Goods Lift, Industrial Scissor Lift Table, Power Hydraulics Lift, etc. The company was founded in 2014 by Mr. Mahesh Patel under whose guidance we have been growing in leaps & bounds. Our company carries its business operations at a well-equipped infrastructural set-up, consisting of segregated departments. We have stacked our manufacturing unit with modern equipment and with latest amenities.

The importance of material handling equipment is immense especially in construction work as it reduces human labor, time and most importantly, it makes work easier for the workers. With the endeavor to earn a reputed position in the industry by serving clients in the best way, our company, Care Equipment was established in the year 2014. We are based in Ahmedabad, Gujarat (India) and are backed with a team of dedicated professionals, who ensure that every requirement placed is catered with sincerity. We offer our products in various sizes and specifications at market leading prices that are delivered with the assurance of being top quality.

Dedicated Teammates

The team of ours is reinforced by a squad of expert professionals having a rich experience in their zones of specialization. With their in-depth awareness, the team is able to execute its skills in an effective manner and thus accolades in boosting a good relation with the customers. We also have attained research personnel who incessantly struggle hard to advance new techniques for a cost efficient production.

Quality Comes First

The company comprehends the status of quality and hence emphasizes on providing outstanding products. We manufacture our products by following rigorous quality control structures so as to prevent the products from manufacturing defects. We start our quality systems right from the phase of raw material procurement from the dealers until the distribution of the products. Our stringent quality control method enables us to offer only defect free as well as high performing range. The entire variety follows the intercontinental standards of quality and hence is exceedingly valued for their outstanding features.
